Tue, 17 Apr 2018 15:37:00 GMT Resolve a DOI Name - A thermoset, also called a thermosetting plastic, is a plastic that is irreversibly cured from a soft solid or viscous liquid, prepolymer or resin. The process of curing changes the resin into an infusible, insoluble polymer network, and is induced by the action of heat or suitable radiation often under high pressure, or by mixing with a catalyst. Thermosetting polymer - Wikipedia - Defence Science Journal is a peer-reviewed, Open Access, multidisciplinary journal, publishes original research papers having direct bearing on Defence/military.
